3. Penjelasan

Kode ini adalah sebuah aplikasi simulasi transfer bank berbasis Node.js yang membaca konfigurasi dari file <code>BankTransferConfig</code>, lalu menjalankan proses interaktif menggunakan modul <code>readline</code>. Program pertama-tama meminta pengguna untuk memasukkan jumlah uang yang ingin ditransfer, kemudian menghitung biaya transfer berdasarkan nilai ambang batas (<code>threshold</code>) dari konfigurasi: jika jumlah uang di bawah atau sama dengan threshold, maka biaya rendah dikenakan; jika lebih, biaya tinggi digunakan. Setelah itu, total biaya ditampilkan, disesuaikan dengan bahasa (Bahasa Indonesia atau Inggris) yang ditentukan dalam konfigurasi. Pengguna kemudian diminta memilih metode transfer dari daftar yang disediakan, dan diminta untuk mengetik kata konfirmasi tertentu (juga bergantung pada bahasa). Jika kata yang diketik cocok, maka transfer dianggap berhasil; jika tidak, transfer dibatalkan. Interaksi ditutup dengan <code>rl.close()</code> setelah proses selesai.
